

CHRONIC ANKLE PAIN?

If ankle pain is affecting your quality of life and inhibiting you from walking and doing the things you love to do, we can help!

DR. MICHAEL J. WALKOVICH

Board Certified Reconstructive Foot & Ankle Surgeon

Ankle Replacement

Ankle Replacement is designed to decrease pain while improving motion!

Ankle replacement surgery is a safe and effective treatment option for select patients with ankle arthritis!

Dr. Walkovich is an experienced physician of the foot and ankle serving the greater Toledo area since 1997. He has designed surgical instruments for these procedures.

- Specializing in complex foot and ankle reconstruction.
- Performing Total Ankle Implant surgery since 2008
- Revision of failed ankle implant
- Reversal of previous ankle fusion
- A patient-specific approach using CT computer imaging for a patient customized implant

WRIGHT
FOCUSED EXCELLENCE

Dr. Walkovich and his staff were very professional and pleasant. My ankle healed within 8 weeks and became stronger than it has been in 10 years. If asked what would I tell other people suffering from the same pain that I was, I would say go ahead with the operation. It has increased my quality of life by 100%.

- Charles M.

I now finally have an ankle that is almost as normal as it once was, way back before it ever initially started hurting. I owe this all to Dr. Walkovich and his expertise at being able to accomplish this feat. Recently, he told me my case is the second worst ankle he had ever seen. I can only highly recommend him to anyone with a problem. He not only has the ability to surgically solve an unconventional problem, he also is a very empathetic person, a trait which is to be treasured in a doctor.

- Lesanne B.
